

JOSHUA L. CAMBRONERO

Software Developer | IT Support | Graphic Designer

Matti, Digos City, Philippines • +63 993 419 6978 • joshuacambronero.personal@gmail.com • github.com/jsnowify • linkedin.com/in/joshua-cambronero

PROFESSIONAL SUMMARY

Versatile Information Technology student with hands-on experience in full-stack software development, technical support, and graphic design. Skilled in building scalable web and mobile applications, troubleshooting systems, and producing professional visual materials. Brings a unique combination of technical depth and creative ability, with a strong foundation in modern development frameworks, cloud databases, and UI/UX design tools.

ORGANIZATIONAL EXPERIENCE

Technical Committee Member | *DSSC Junior Rotaract Club* Aug 2025 – Present

- Produced 3–5 visual and publication materials supporting community outreach initiatives.
- Delivered technical and design assistance across multiple campaigns, improving overall event presentation quality.

Social Media & Technical Committee | *Guild of Computing Students* Sept 2024 – Jun 2025

- Crafted 3–5 digital publication materials for student events, boosting online engagement for the organization.
- Contributed promotional assets for the PSITS 2024 regional event, reaching hundreds of computing students across the region.

PROJECTS

Full-Stack Developer | *Snuzz – Android Noise Detection App (Capstone)* Jun 2025 – Dec 2025

- Engineered a native Android noise detection app in Kotlin, achieving real-time acoustic data processing via device microphone hardware.
- Integrated Firebase for cloud data synchronization, offloading storage and enabling cross-session data persistence.
- Constructed a responsive mobile UI applying UI/UX principles, resulting in a clean single-screen monitoring experience.

Full-Stack Developer | *DSS-Confessions – Community Web Platform* Jan 2026 – Feb 2026

- Launched a full-stack web platform using React and Node.js, onboarding 40+ users within the first weeks of release.
- Applied Supabase (PostgreSQL) for database management and enforced 3-layer security: XSS filtering, API rate limiting, and Row Level Security (RLS).

Full-Stack Developer | *DSS-Connectify – Social Media Application* Feb 2026 – Present

- Architecting a React Native social media app targeting 100+ students, with a focus on intuitive mobile-first UX.
- Overseeing full project architecture and version control via Git, maintaining a scalable codebase across multiple active features.

EDUCATION

Bachelor of Science in Information Technology Expected: August 2026

Davao del Sur State College • Matti, Digos City

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence, Machine Learning

TECHNICAL SKILLS

Programming Languages: JavaScript, Kotlin, Java, Python, SQL

Web & Mobile Development: React, React Native, Android Development, HTML, CSS

Backend & Cloud: Node.js, Firebase, Supabase, Django, PostgreSQL, MySQL

Graphic Design & UI/UX: Figma, Adobe Illustrator, Affinity Designer, Canva

Tools & Methodologies: Git, GitHub, System Architecture, API Integration, Technical Support & Troubleshooting
